Deep Cuts
shot detection for cinematographic analysis

RACHEL ALBERT
ALEX HALL
JONATHAN HARPER
AMY PAVEL

CS280 Final Project, Spring 2015

Introduction

Short introduction goes here.

Background & Significance

Literature review and short summary of our contribution goes here.

Style and Face Detection

Description of Alex's work goes here.

Methods

Briefly describe the algorithms used.

Results

Show the results.

Shot Detection

Short summary of why we did shot detection (transition from face detection) goes here.

Adaptive Thresholding

Briefly describe thresholding method and show the results.

Random Forests

Briefly describe random forests method and show the results.

CNN

Briefly describe CNN method and show the results.

Summary & Conclusion

Short summary and conclusion goes here.
